## **WASTE MINIMIZATION STATEMENT FOR YEAR 2015**

Cramer Plating Company located at #4 Hoyt Lane, Belvidere, New Jersey has attached this statement to the Annual Export Report.

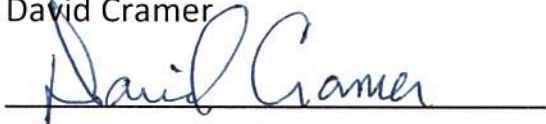

Once again the challenge of reducing our Hazardous Waste has taken a step forward. We began by relocating the sludge dryer to a friendlier environment so that it would work more efficiently. The surrounding air temperature is more favorable for the equipment. We have been able to dry our sludge in a shorter time frame and have also reduced the moisture content.

We now have additional distilled water that is generated from the sludge dryer to use in our plating and anodizing process.

Also, in order to speed up the evaporation in the 3 atmospheric evaporation units, the pre-heat process tanks have had additional coils added. This decreased our process time and allowed us to recycle more water throughout the plant. We continue to try new products looking for longer tank life.

We have achieved some progress by using a trivalent zinc chromate. This process allows us to change the bath bimonthly instead of biweekly. This has reduced the disposal volume by several hundred gallons per year.
